# 'Choose legacies with values'

Staff Reporter

**COIMBATORE:** Choice is an important factor in the legacy that an individual leaves behind, P.W.C. Davidar, Information Technology secretary, Government of Tamil Nadu, said here on Wednesday.

At a meeting organised by the Kovai Medical Center and Hospital (KMCH) on "The Impact of Interventional Radiology in the Society", Mr. Davidar launched the website [www.irtreatment.org](http://www.irtreatment.org) and spoke on "The legacy we leave behind".

He said every individual left behind a legacy. Every one should choose legacies with values.

The legacies that one left behind could be habits, patterns of lifestyle, attitudes or assets. It was something handed down.

And, the legacy could be at the family or society-level.

"All of us have been affected or benefited by somebody's legacy."

Choice was an important factor and each individual had the choice to leave behind

**GOING ONLINE:** Secretary of Information Technology, Government of Tamil Nadu, P.W.C. Davidar (left), launching the website on Interventional Radiology of Kovai Medical Center and Hospital in Coimbatore on Wednesday. Chairman of the hospital Nalla G. a good legacy.

It was important to recognise the legacies that an individual was part of and to support the legacy that others were building, he said.

Kavitha Rajan, Director of Master Mind Solutions, explained the features of the

website.

Dr. Nalla G. Palaniswami, chairman of the hospital, spoke about Interventional Radiology.

Some of the patients who had been treated with interventional radiology shared their experiences.
